PAWAN YADAV

Front-End Web Developer

pawanyadavbhu2004@gmail.com | +91-9696045551 | Varanasi, Uttar Pradesh | LinkedIn | GitHub | Hacker Rank

PROFILE

BCA graduate with proficiency in Python and hands-on exposure to Generative AI and AI & Data Solution Architecture, alongside strong front-end skills in HTML5, CSS3, and JavaScript. Built and deployed four live web projects independently, with strong problem-solving and debugging ability, effective team collaboration, and clear technical communication. Seeking to apply these skills as an Analyst / Developer at Deloitte's Next Level Analyst Program.

SKILLS

- **Programming Languages:** Python, C, C++, Java
- **Web Technologies:** HTML5, CSS3, JavaScript (ES6+), Bootstrap.
- **Databases:** SQL, PostgreSQL
- **Version Control:** Git, GitHub
- **Tools & Debugging:** Visual Studio Code, MS Office, debugging tools & techniques for application behaviour analysis
- **Cybersecurity Fundamentals:** OWASP Top 10 basics, secure coding practices
- **Core Strengths:** Strong problem-solving and diagnostic ability, effective team collaboration, clear technical communication

EDUCATION

- **Bachelor of Computer Applications (BCA)** — Mahatma Gandhi Kashi Vidyapith, Varanasi
  Final Year | CGPA: 7.1 | 2026
- **Class XII – CBSE** — Shandilya Public School
  2022

ACADEMIC PROJECTS

Kashi Guest House Website — GitHub Link | Live Demo

- Built a fully responsive guesthouse website (mobile, tablet, desktop) using semantic HTML5 and CSS Grid/Flexbox.
- Structured content into 4 clear sections (Home, Rooms, Amenities, Contact) to improve navigation and user experience.

Future Gear – E-Commerce UI — GitHub Link | Live Demo

- Built a lifestyle/tech e-commerce storefront with category filtering (Footwear, Apparel, Accessories, Audio) and individual product detail pages.
- Designed a consistent product card layout displaying pricing, tags (e.g. New Arrival), and category badges across 6+ products.

Amazon Clone – E-Commerce Homepage — GitHub Link | Live Demo

- Replicated Amazon's homepage UI including navigation bar, category carousels, and footer structure to practice pixel-accurate frontend cloning.
- Focused on layout precision and component reuse to match a large-scale, real-world e-commerce interface.

Personal Portfolio — GitHub Link | Live Demo

- Designed and developed a personal portfolio site to showcase projects, technical skills, and academic background.
- Applied frontend development best practices including semantic markup and mobile-first responsive layout.

CERTIFICATIONS

- **TCS-iON:** AI and Cybersecurity Awareness, offered under the **"AI for ALL"** program by **MPIT -CoE** in partnership with the **TCS Foundation.**
- **Hammer Week-of-Wins** organised by **Unstop.**
- **TCS iON Career Edge - IT Primer -**learned IT Industry Overview, Tools Industry Elements, Trending Technologie, Career and Growth
- **Deloitte Australia – Cyber Job Simulation:** Simulated **real-world** security incident response and analysis tasks.
- **The Future of Full Stack Development**
- **Tata – Cybersecurity Analyst Job Simulation:** Completed threat identification and risk assessment exercises.

LANGUAGES & INTERESTS

- **Languages Known:** English, Hindi
- **Interests:** Web Development, Cybersecurity, and Continuous Learning
